

# FolkArt Super Glow

## Premium Acrylic Glow-in-the-Dark Paint

### Frequently Asked Questions

#### **What is FolkArt Super Glow?**

FolkArt Super Glow is a permanent, water-based glow-in-the-dark paint that performs well after being charged with exposure to bright light. Once applied to a porous surface and charged, Super Glow will glow over and over after each recharge.

#### **How is FolkArt Super Glow packaged?**

Super Glow comes in a carded 2 oz. bottle with an easy-to-use flip-top lid.

#### **On what surfaces can I use FolkArt Super Glow?**

Super Glow works best on most porous craft surfaces such as wood, terra cotta, canvas, and papier mache.

#### **Can I use FolkArt Super Glow on fabric?**

Yes, FolkArt Super Glow can be painted on fabric, but for decorative purposes only. The formula is not washable.

#### **What is the best way to apply FolkArt Super Glow?**

Super Glow can be applied to most craft surfaces using either a bristle brush or a foam applicator. Simply shake well, flip the top, squeeze a small amount onto a palette, and begin painting! You can even sponge FolkArt Super Glow onto a project surface.

#### **How many coats of FolkArt Super Glow should I apply?**

That's up to you. Glow can be achieved in as little as one or 2 coats, but for the ultimate glow, you can apply up to 5 layers of Super Glow paint. Make sure to allow approximately one hour dry-time between each coat.

#### **What is the best way to charge a surface painted with FolkArt Super Glow?**

Once Super Glow has been painted on a surface and is dry, it will need to be charged under a bright light for at least 30 minutes or direct sunlight for at least 10 minutes to activate the glow properties.

#### **How long does it take FolkArt Super Glow to charge, and how long will it glow after being charged?**

FolkArt Super Glow will be fully charged in approximately 30 minutes in direct sunlight or a bright light. Once fully charged, Super Glow will glow for approximately 1 hour.

**Is FolkArt Super Glow durable?**

Yes, FolkArt Super Glow dries to a lasting, permanent finish that can be recharged over and over.

**Is FolkArt Super Glow suitable for outdoor project use?**

Yes, FolkArt Super Glow can be used on both indoor and outdoor surfaces.

**How long does it take FolkArt Super Glow to cure on the project surface?**

FolkArt Super Glow, once painted on a surface, will be dry to the touch in one hour and cured to the surface in 48 hours.

**Do I need to seal my finished Super Glow project with a varnish to make it permanent?**

No. Once fully dry, FolkArt Super Glow is self-sealing and is permanent to the surface.

If the painted glow surface was top-coated with a water-based varnish or a solvent-based spray finish, however, the glow properties should NOT be affected. A reason to top-coat a FolkArt Super Glow project surface would be if the entire surface was not Super Glow, perhaps a stenciled design was applied or an area was color blocked.
