

Mod Podge Collage Clay FAQs

What is Mod Podge Collage Clay?

Mod Podge Collage Clay is a non-toxic, lightweight whipped clay primarily used in creating a decoden-style craft project. Decoden is the art of embedding small trinkets into whipped clay creating decadent and whimsical items such as cell phone cases, frames, and boxes.

Is Mod Podge Collage Clay available in colors?

Mod Podge Collage Clay is available two trend right colors: Vanilla White and Strawberry Pink.

On what type of surfaces can I apply Mod Podge Collage Clay?

Mod Podge Collage Clay can be applied to most craft surfaces such as wood, terra cotta, tin, plastic, canvas, paper mache, glass and ceramics.

How shall I apply Mod Podge Collage Clay to my project?

Mod Podge Collage Clay is packaged in a forcing bag and is equipped with three different tips (Star Tip, Round Tip and a Wavy Tip) as well as a cap to seal the bag between uses. After attaching the tip of choice, simply squeeze the forcing bag to apply Mod Podge Collage Clay to your crafting surface. While still wet, begin embedding small trinkets, Mod Podge Mod Mold embellishments or other small items into the clay.

What kinds of items can I embed in the Mod Podge Collage Clay?

Mod Podge Mod Mold embellishments are perfect for Mod Podge Collage Clay. You can also embed small trinkets, charms and flat back gems.

What is Mod Podge Collage Drizzle Paint?

Mod Podge Collage Drizzle Paint is a great way to add to your Collage Clay project. Collage Drizzle Paint is available in four fun colors, white, pink, red and brown which will add the extra drama and dimension to your Collage Clay creation.

How shall I apply Mod Podge Collage Drizzle Paint?

Mod Podge Collage Drizzle Paint is packaged in a small squeezable tube with a writer tip. After removing the cap, turn the tube upside down keeping it elevated over your

project, lightly squeeze and move over your crafted surface to allow the Collage Drizzle Paint to fall onto your project. Recap after each use.

What are Mod Podge Podgeable Glitters?

Mod Podge Podgeable Glitters are super fine glitters available in four colors, (gold, silver, magenta and turquoise) packaged in small squeezable plastic tubes. The packaging allows you to squeeze the exact amount of glitter where needed on your craft project. Mod Podge Podgeable Glitters are the perfect topping to a Collage Clay project for that added sparkle! Mod Podge Podgeable Glitters can also be used with Mod Podge Rocks Peel & Stick Stencils!

What is the best way to apply Mod Podge Podgeable Glitters to my project?

Mod Podge Podgeable Glitters are fun to use, simply remove the cap, invert the tube and lightly squeeze. A small “pouf” of glitter will fall onto your craft project from the nozzle tip. If you accidentally over applied the glitter, excess can be captured and reloaded into the tube after unscrewing the nozzle tip.

How long will it take my Mod Podge Collage Clay project to dry?

Mod Podge Collage Clay will begin to dry within the hour depending on the thickness applied and the humidity of your work area. It may take from 2 – 5 days to be totally cured again depending on the application thickness and humidity.

How shall I clean my Mod Podge Collage Clay tip or other supplies after crafting?

Mod Podge Collage Clay, Drizzle Paint and Podgeable Glitters clean up easily while wet with warm soapy water.

What does a Mod Podge Collage Clay project look or feel like when dry?

Mod Podge Collage Clay will dry as lightweight whipped clay with a matte finish resembling frosting on a cake. Mod Podge Drizzle will dry with a slight sheen or gloss and Mod Podge Podgeable Glitters will, of course, be glittery!

How shall I care for my Collage Clay project, can I wash it?

A crafted Mod Podge Collage Clay project should be intended for decorative purposes only as it is not dishwasher or washing machine safe. To clean your project, wipe over using a damp soft cloth, do not fully immerse in water.
